## Profile

---

I specialize in writing clean code, bringing elegant user interfaces to life, enhancing user experience, and staying up-to-date with modern trends to remain relevant.

## Work Experience

---

- 05/2025 – 09/2025  
Remote

**FullStack Developer**  
*IdealsCapital*
  - Maintained the company’s website and developed internal tooling to improve workflow efficiency across teams.
  - Integrated REST APIs and optimized backend endpoints, ensuring seamless communication between the frontend and server.
  - Built scalable dashboards and admin interfaces using React, Node.js, and database-driven workflows.
  - Implemented reusable UI components and improved code maintainability using TypeScript, ensuring strict type-safety across the codebase
- 01/2025 – 03/2025  
Remote

**Frontend Developer**  
*HNG-Internship*

Collaborated with UX designers to create intuitive interfaces, reducing bounce rates by 20% and enhancing site navigation. Delivered pixel-perfect designs and integrated Chrome’s Built-In API.

Led migration of legacy code to modern frameworks, reducing load times by 0% and improving user satisfaction.
- 11/2023 – 12/2024  
Abakaliki, Ebonyi State

**Frontend Developer**  
*Knoweth*
  - Resolved bugs, refactored legacy code, and shipped feature updates to enhance performance and long-term stability.
  - Collaborated with UI/UX designers to translate wireframes into responsive, pixel-perfect interfaces using React and Tailwind CSS.
  - Optimized component architecture and state management to improve render efficiency and reduce bundle size.

## Education

---

01/2023 – Present

**Statistics | BSc in Statistics**  
*Alex-Ekwueme Federal University Ndufu-Alike, Nigeria.*

## Skills

---

Responsive Web Design	HTML/CSS
JavaScript	React
TypeScript	Tailwind
version Control	Docker
Tanstack Start	Next Js
Material UI	Node js

## Projects

---

### Survey Managerial

<https://iic-survey.vercel.app/>

A platform where surveys are created, managed, and published from the admin panel. After participants complete surveys, the admin receives the responses in real time. Built with Next.js, Supabase, Framer Motion, and React Virtualization.

### Where in the World?

<https://country-details-gray.vercel.app/>

A web application that provides detailed information about any country in the world. Built with Next.js and TypeScript, using the REST Countries API, Framer Motion, and React Virtualization.

### url\_Brander

<https://url-shortening-cyan-ten.vercel.app/>

- Designed an intuitive user interface for url\_Brander, boosting user engagement by 30% and simplifying link management.
- Implemented responsive design, improving cross-device usability and increasing mobile user satisfaction by 25%.
- Enhanced website loading speed by 0%, reducing bounce rates and increasing user retention.
- Integrated the Clean URI API, reducing error rates by 15%.

### Farmculator

<https://farmculator.vercel.app/>

- Delivered a pixel-perfect web development project with a fully responsive design
- Integrated Live sharing functionality, Integrated Gemini-2.5-flash.

Successfully passed the evaluation test conducted by my mentor.

## Certificates

---

### Legacy JavaScript Algorithms and Data Structures

Mastered coding concepts, problem-solving, and optimizing code for better performance and efficiency in software development.

### Front End-Development

Certified in Frontend Development through Zuri Training, mastering HTML, CSS, and JavaScript to build responsive, user-friendly web applications with hands-on project experience
