Profile

I specialize in writing clean code, bringing elegant user interfaces to life, enhancing user experience, and staying up-to-date with modern trends to remain relevant.

Work Experience

- 05/2025 – 09/2025

Frontend Developer
IdealsCapital
Developed a survey platform that allows administrators to create and publish surveys for their audience, receive structured feedback, and manage responses efficiently. The surveys are fully editable, and responses can be filtered by day, week, or month for better insights. Additionally, contributed to building an e-commerce platform and several other projects.
- 01/2025 – 03/2025
Lagos, Nigeria

Frontend Developer
HNG-Internship
Collaborated with UX designers to create intuitive interfaces, reducing bounce rates by 20% and enhancing site navigation. Delivered pixel-perfect designs and integrated Chrome's Built-In API.
Led migration of legacy code to modern frameworks, reducing load times by 0% and improving user satisfaction.

Education

- 01/2023 – Present

Statistics | BSc in Statistics
Alex-Ekwueme Federal University Ndufu-Alike, Nigeria.

Skills

Responsive Web Design	HTML/CSS
JavaScript	React
TypeScript	Tailwind
version Control	Docker
Tanstack Start	Next Js
Material UI	Node js

Projects

Survey Managerial

<https://iic-survey.vercel.app/>

A platform where surveys are created, managed, and published from the admin panel. After participants complete surveys, the admin receives the responses in real time. Built with Next.js, Supabase, Framer Motion, and React Virtualization.

Where in the World?

<https://country-details-gray.vercel.app/>

A web application that provides detailed information about any country in the world. Built with Next.js and TypeScript, using the REST Countries API, Framer Motion, and React Virtualization.

url_Brander

<https://url-shortening-cyan-ten.vercel.app/>

- Designed an intuitive user interface for url_Brander, boosting user engagement by 30% and simplifying link management.
- Implemented responsive design, improving cross-device usability and increasing mobile user satisfaction by 25%.
- Enhanced website loading speed by 0%, reducing bounce rates and increasing user retention.
- Integrated the Clean URI API, reducing error rates by 15%.

Farmculator

<https://farmculator.vercel.app/>

- Delivered a pixel-perfect web development project with a fully responsive design
- Integrated Live sharing functionality, Integrated Gemini-2.5-flash.

Successfully passed the evaluation test conducted by my mentor.

Certificates

Legacy JavaScript Algorithms and Data Structures

Mastered coding concepts, problem-solving, and optimizing code for better performance and efficiency in software development.

Front End-Development

Certified in Frontend Development through Zuri Training, mastering HTML, CSS, and JavaScript to build responsive, user-friendly web applications with hands-on project experience
