### Profile

I'm an Analytical, detail-driven professional with a Statistics background and hands-on experience in AI data annotation and structured grounding evaluation. Skilled at interpreting detailed documentation, applying rigorous critical reasoning, and communicating findings clearly in fluent, professional American English. Comfortable comparing and evaluating outputs from multiple large language models (ChatGPT, Claude), articulating strengths and weaknesses with precision, and maintaining consistent quality standards across high-volume, high-context workflows.

### Core Strengths For AI Evaluation Work

- AI Training & Response Evaluation - direct experience annotating dense, structured grounding tasks under strict quality standards.
- Critical Thinking & Analytical Reasoning - Statistics degree grounded in structured, evidence-based analysis and pattern evaluation.
- Attention to Detail & Documentation Interpretation - track record of following detailed technical specs (API contracts, QA test criteria, style/type-safety rules) with strict compliance.
- Clear Communication - fluent written and spoken English; experienced articulating technical reasoning to distributed, remote teams.
- LLM Familiarity - regular hands-on use of ChatGPT, Claude, and similar tools in real development and problem-solving workflows.

### Professional Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                    |

| <ul style="list-style-type: none"><li>• Wrote automated tests and validation criteria for critical endpoints - direct experience defining and applying evaluation standards for correctness and quality.</li><li>• Engineered and load-tested REST APIs against ~1M request scenarios, using structured, metrics-based analysis to identify and resolve performance issues.</li><li>• Designed secure authentication/authorization flows requiring careful, detail-oriented interpretation of security specifications.</li></ul>             |                                    |

## Education

---

**BSc in Statistics**, Alex-Ekwueme Federal University Ndufu-Alike, Nigeria  
*Coursework grounded in statistical reasoning, data analysis, and structured evaluation of evidence directly applicable to systematic AI output assessment.*

01/2023 – Present

## Certificates

---

**JavaScript Algorithms and Data Structures**  
problem-solving, logic, and code-quality optimization.

**Front End Development (Zuri Training)**  
HTML, CSS, JavaScript; hands-on project-based certification.

## Availability & Setup

---

- Immediately available, full-time remote contractor.
- Reliable computer, stable high-speed internet, and quiet, distraction-free environment for screen and audio recording sessions.
